

IMA AUTOMATION

at MEDICAL TECHNOLOGY UK 2022

The **medical device sector** is preparing for Medical Technology UK, the important medical product showcase that starts on March 16th in Coventry, United Kingdom.

IMA AUTOMATION will be attending the event to present its advanced technologies and latest developments for the medical devices market. Come and join the IMA AUTOMATION Hub in Coventry, **from March 16th to 17th**, meet our experts at our **Stand 48** and find out all about our exciting cutting-edge technologies.

Flexible and reliable assembly solutions

IMA AUTOMATION plays a major role in the medical devices industry, and at Medical Technology UK 2022 it will offer visitors a special focus on its innovations in the drug delivery, diagnostics, surgical instruments, tubing sets and wearables sectors.

Each device has its own unique challenges. But, thanks to our range of standard linear and rotary platforms and our indexing and continuous motion assembly capabilities, we can optimize designs to suit the individual needs of different assembly processes, taking into account production requirements and optimizing the floor space available in your clean room.

Drug Delivery

The Medical Technology 2022 event in Coventry will focus particularly on drug delivery, a market sector in which IMA AUTOMATION offers numerous ground-breaking solutions.

Diagnostics

The Point of Care and In Vitro markets are also covered extensively by the IMA AUTOMATION hub thanks to our well-established assembly and test technologies that are specifically designed to meet all market needs.

Surgical Instruments

IMA AUTOMATION provides flexible automated solutions for surgical suture assembly and crimping that ensure superior product quality. Our technology can also handle a wide range of needles and threads as well as guaranteeing fast product changeover times and the flexibility required to produce large or small batches.

Wearables

Our delivering and monitoring solutions will also be on show and our experts will be on-hand to explain why our cutting-edge solutions are such an important step forward in this market sector.

Tubing sets

Automatic infusion and extension set assembly and testing technologies are another important part of IMA AUTOMATION's range of solutions. So, come and visit our stand at this show in Coventry to discover more!
